South Haven, Michigan

Spring and Summer 1935.

The perennials and bulbs listed below are all grown in rich, sandy soil which gives a heavy root development and makes a strong sturdy plant. Irrigation was used during the past summer so the plants are not dwarfed or stunted by the drought. Shipping costs are held to the minimum because the sandy soil shakes off the roots completely, and all packing is done as light as possible consistent with safe delivery. All shipments are carefully graded, A-1 stock, guaranteed to be true to name.

Terms: cash with order, F. O. B. South Haven, Mich., no charge for packing.
